

Raahav Ajith K S

Flutter Developer — 4+ Years Experience — BLoC — Clean Architecture — Scalable Mobile Applications

+91 6382799376 | ajithraahav@gmail.com | LinkedIn | GitHub | Portfolio | Tamil Nadu, India

Professional Summary

Flutter Developer with 4.5+ years of experience building scalable mobile and web applications using Flutter and Dart. Delivered production applications across healthcare, government, logistics, hospitality, and transportation domains. Strong expertise in BLoC, Clean Architecture, REST API integration, offline-first systems, and performance optimization.

Technical Skills

Programming: Dart, JavaScript, Kotlin, HTML, CSS

Frameworks: Flutter, Flutter Web (latest stable versions)

State Management: BLoC, Cubit, Provider

Architecture: Clean Architecture, MVVM, Repository Pattern

Navigation: Navigator 2.0 (Basic), go_router, Deep Linking

API Integration: REST APIs, GraphQL (Basic), Caching, Error Handling, Retry Mechanisms (Exponential Backoff)

Mobile Integrations: Firebase (Auth, FCM, Crashlytics), Google Maps API, Location Services, Razorpay

Databases: Hive, SQLite, MySQL

Performance Optimization: Widget rebuild optimization, Image optimization, Lazy loading, Pagination, Memory profiling

UI/UX: Responsive UI, Flutter Animations (Implicit/Explicit)

Testing: Unit Testing, Widget Testing, Debugging

DevOps & Tools: Git, GitHub, Azure DevOps (CI/CD), Fastlane (Basic), GitHub Actions (Basic)

Platform Integration: Platform Channels (Basic), FFI (Explored)

Monitoring: Firebase Crashlytics, Logging

AI / ML Integration: MediaPipe, TensorFlow Lite (TFLite), On-device ML Model Integration

Professional Experience

MOURI Tech Limited — *Consultant – Flutter Developer*
Chennai, India

May 2026 – Present

- Working on a contractual Flutter engagement for a US-based healthcare application following HIPAA-focused data handling practices.
- Developing Flutter features using BLoC, Clean Architecture, and API integrations for a HIPAA-sensitive healthcare environment.
- Collaborating with backend, UI/UX, QA, and client teams throughout development and testing.

Galentic Technology — *Flutter Developer*
Bengaluru, India

Apr 2025 – Aug 2025

- Developed modular Flutter Web applications using Clean Architecture and BLoC.
- Implemented caching, pagination, and retry mechanisms with exponential backoff for API reliability.
- Optimized UI rendering by reducing widget rebuilds and improving performance.

Techzarinfo Software Solutions — *Flutter Developer*
Trichy, India

May 2023 – Mar 2024

- Developed cross-platform mobile applications using Flutter.
- Integrated Firebase services and optimized UI performance.
- Implemented navigation flows using go_router and handled deep linking scenarios.

Yavar Tech Works — *Software Developer*
Coimbatore, India

Mar 2022 – May 2023

- Developed booking and payment applications using REST APIs.
- Implemented offline-first storage using SQLite and Hive.

Exciteon Tree of Technology — *Software Developer*
Trichy, India

Oct 2020 – Mar 2022

- Developed mobile and web applications and maintained API integrations.
- Collaborated with cross-functional teams to debug issues and improve application stability.

Selected Projects

DIGIT – Patient Rehabilitation & Clinical Assessment Platform — *Flutter Healthcare Application* 2026

US Client — MOURI Tech

- Developed Flutter workflows for patient rehabilitation assessment and progress tracking, including PIP flexion and contracture-related measurements.
- Implemented reusable digital widgets and structured data-entry workflows using BLoC and Clean Architecture.
- Integrated backend APIs and collaborated with backend, UI/UX, QA, and client teams in a HIPAA-focused healthcare environment.

Innovatiq Marketing Tracking System — *Workforce Monitoring Platform* 2025
Chennai

- Developed real-time employee tracking using geolocation APIs and background services.
- Implemented local data handling and optimized tracking workflows for reliable field operations.

Tillio POS Platform – Dubai — *POS, KDS & Delivery System* 2025
Dubai

- Enhanced existing POS and restaurant applications and developed a Kitchen Display System for real-time order synchronization.
- Built a delivery partner application with Google Maps integration and navigation workflows.

Malaysia Metro MVP — *Navigation and Booking System* 2025
Malaysia

- Developed metro booking workflows using Flutter, REST APIs, Hive, and Google Maps integration.
- Implemented responsive interfaces and optimized local data handling for improved user experience.

Urakka Sol – Police Reporting App — *Mobile Platform* 2024
Tamil Nadu

- Developed a citizen reporting application supporting image, video, and voice-based incident submissions.
- Implemented structured reporting workflows and integrated backend APIs for data processing.

Norinco Marine Management System — *Offline-first Fleet Management App* 2024
Chennai

- Developed an offline-first Flutter application for vessel maintenance, employee records, checklists, and incident reporting.
- Implemented bulk SQLite storage using BLoC and Clean Architecture for vessels operating with limited connectivity.

Muslim Salah Prayer App — *Prayer Time & Utility Application* 2023
Chennai

- Developed a Flutter prayer-time application using location services and API integration.
- Implemented responsive UI and location-based prayer time workflows.

Education

University of Madras — *BCA (Pursuing)* Expected 2027
Chennai

Seshasayee Institute of Technology — *Diploma* 2017 – 2020
Trichy
