

Raahav Ajith K S

Flutter iOS & Android Developer — 5+ Years Experience — BLoC — Clean Architecture

+91 6382799376 | ajithraahav@gmail.com | LinkedIn | GitHub | Portfolio | Tamil Nadu, India

Professional Summary

Flutter Developer with 5+ years of experience building scalable mobile and web applications using Flutter and Dart for iOS and Android. Delivered production applications across healthcare, government, logistics, hospitality, transportation, and workforce domains. Strong expertise in BLoC, Clean Architecture, REST APIs, offline-first systems, Firebase, responsive UI, performance optimization, and native platform integration. Familiar with Swift, SwiftUI, UIKit, Xcode, iOS SDK, CocoaPods, and Flutter Platform Channels.

Technical Skills

Languages: Dart, Swift, Kotlin, JavaScript, HTML, CSS

Flutter: Flutter iOS/Android/Web, BLoC, Cubit, Provider, Flutter DevTools, Animations, Responsive UI

Architecture: Clean Architecture, MVVM, Repository Pattern, SOLID Principles

iOS: Swift, SwiftUI, UIKit, Xcode, iOS SDK, iOS Lifecycle, CocoaPods, Auto Layout, URL Schemes, Deep Linking, Push Notifications, Permissions, Keychain Concepts, Signing & Provisioning

Android: Kotlin, Android Studio, Android SDK, Gradle, Android Lifecycle, Intents, Permissions, Deep Linking, Push Notifications

APIs & Integration: REST APIs, GraphQL (Basic), JSON, Authentication, Caching, Error Handling, Retry Mechanisms, Firebase Auth, FCM, Crashlytics, Google Maps, Location Services, Razorpay

Database: SQLite, Hive, MySQL, Local Storage, Offline-first Data Management

Performance: Widget Rebuild Optimization, Image Optimization, Lazy Loading, Pagination, Memory Profiling, API Optimization

Platform: Platform Channels, Method Channels, Event Channels, Native iOS/Android Integration, FFI (Explored)

Testing & DevOps: Unit Testing, Widget Testing, Git, GitHub, Azure DevOps, GitHub Actions, CI/CD, Fastlane (Basic)

AI/ML: MediaPipe, TensorFlow Lite (TFLite), On-device ML Integration

Professional Experience

MOURI Tech Limited — *Consultant – Flutter Developer*
Chennai, India

May 2026 – Present

- Developing cross-platform Flutter features for a US-based healthcare application using BLoC, Clean Architecture, REST APIs, and reusable components.
- Building responsive iOS and Android workflows with platform-specific permissions, lifecycle handling, deep linking, and native integrations.
- Collaborating with backend, UI/UX, QA, and client teams throughout development and testing in a HIPAA-focused environment.

Galentic Technology — *Flutter Developer*
Bengaluru, India

Apr 2025 – Aug 2025

- Developed modular Flutter Web applications using Clean Architecture and BLoC.
- Implemented caching, pagination, retry mechanisms with exponential backoff, and API error handling.
- Optimized UI rendering by reducing unnecessary widget rebuilds and improving application performance.

Techzarinfo Software Solutions — *Flutter Developer*
Trichy, India

May 2023 – Mar 2024

- Developed cross-platform mobile applications using Flutter for iOS and Android.
- Integrated Firebase Authentication, FCM, Crashlytics, REST APIs, and responsive UI components.
- Implemented go_router navigation, deep linking, URL schemes, and mobile application lifecycle workflows.

Yavar Tech Works — *Software Developer*
Coimbatore, India

Mar 2022 – May 2023

- Developed booking and payment applications using Flutter, REST APIs, Google Maps, and location services.
- Implemented offline-first storage using SQLite and Hive for reliable mobile workflows.

Exciteon Tree of Technology — *Software Developer*
Trichy, India

Oct 2020 – Mar 2022

- Developed mobile and web applications, maintained REST API integrations, and implemented responsive interfaces.
- Collaborated with cross-functional teams to debug issues and improve application stability.

Selected Projects

DIGIT – Patient Rehabilitation & Clinical Assessment Platform — *Flutter Healthcare Application*
US Client — MOURI Tech

2026

- Developed patient rehabilitation assessment and progress-tracking workflows including PIP flexion and contracture-related measurements.
- Implemented reusable widgets and structured data-entry workflows using BLoC, Clean Architecture, and backend API integration.
- Supported cross-platform iOS and Android workflows with permissions, lifecycle handling, and platform-specific requirements.

Innovatiq Marketing Tracking System — *Workforce Monitoring Platform*
Chennai

2025

- Developed real-time employee tracking using geolocation APIs, background services, and local data handling.
 - Worked with location permissions, application lifecycle, and platform-specific background execution requirements.
- Tillio POS Platform – Dubai** — *POS, KDS & Delivery System* 2025
Dubai
- Enhanced restaurant POS applications and developed a Kitchen Display System for real-time order synchronization.
 - Built delivery partner workflows using Flutter, Google Maps, navigation, and location services.
- Malaysia Metro MVP** — *Navigation and Booking System* 2025
Malaysia
- Developed metro booking workflows using Flutter, REST APIs, Hive, and Google Maps integration.
 - Implemented responsive interfaces, local data handling, navigation, and cross-platform mobile workflows.
- Norinco Marine Management System** — *Offline-first Fleet Management App* 2024
Chennai
- Developed an offline-first Flutter application for vessel maintenance, employee records, checklists, and incident reporting.
 - Implemented bulk SQLite storage using BLoC and Clean Architecture for vessels operating with limited connectivity.
- Urakka Sol – Police Reporting App** — *Citizen Reporting Platform* 2024
Tamil Nadu
- Developed citizen reporting workflows supporting image, video, and voice submissions with backend API integration.
 - Implemented media handling, mobile permissions, and responsive Flutter interfaces.

Education

-
- University of Madras** — *BCA (Pursuing)* Expected 2027
Chennai
- Seshasayee Institute of Technology** — *Diploma* 2017 – 2020
Trichy
